

Seville(Spain),23Jan 2015

Dear Mr/Mrs. HR responsible,

As you could read in my C.V i have investing for 11 years in IT , five of whom as main responsible of Information Technology in an Agroalimentary company with more than 200 employees. As IT Director i have been responsible for the proper functioning of all systems and take the company to the twenty-first century. Previously i was working in Telvent(Abengoa Group) as project manager deploying energy projects.Recently Abengoa has recruited me again for my deeply knowledge about control system and my main challenge will be create a new department for this purpose.

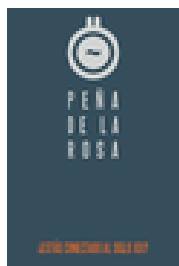

I pride myself on being a results oriented, hands-on individual with progressive management experience and for that reason I trained in MBA. Technology is my life, so i am always in a technological surveillance process and i am continuing learning in this amazing digital age we are living.

Move my residence permanently is not a problem because for my last jobs i have been working for months in different countries and i have adapted easier to other life style.

What it cannot illustrate, however, is the degree of dedication, resourcefulness, and professionalism that I can offer. A personal conversation will enable us to discuss how I can contribute your intent to increase the world's leading technology. I look forward to pursuing this relationship with you in the near future.

Sincerely,

Antonio Peña de la Rosa

MBA. Ingeniero Informático
